September 2009**

"We are what we repeatedly do. Excellence, therefore, is not an act, but a habit". Aristotle

This course is:

- ◆ Very interactive and supplemented with abundant practical exercises and case studies
- ◆ Equally beneficial for all Industrial Sectors (Manufacturing Industry Continuous Process Industry - Construction Industry - Service Establishments Engineering) and for Public/ Governmental and semi-Public Bodies and Institutions active in all sizes Maintenance works.

Learning Outcomes

- Understand the basics of modern maintenance and plant management the Lean Thinking philosophy, performance goals and other critical success factors;
- Understand the real reasons of failure of maintenance operations, managed and planned with a "traditional" style;
- Trigger a different thinking mechanism, suited to focus on crucial issues of the planning process;
- Use lean ideas to see maintenance works as "waste-less flow processes" and to think about improvement of the whole maintenance function;
- Equip your toolbox with lean planning tools, tips and techniques;
- Learn how to ensure maintenance works of any size/scale will be accomplished in time, within budget and with overall satisfaction;
- Understand the difference between traditional Plant Management and Lean Plant/Assets Management;
- Learn how to transmit lean concepts to your own people and to external parties such as maintenance sub-contractors;
- Implement strategies to increase Plant Performance through lean-thinking people while assuring their job satisfaction
