World Class Manufacturing

*An intensive 3-day course
on how to drastically increase
quality, productivity and
"responsiveness" in the
Manufacturing Industry*

venue

**Jacaranda Hotel, Nairobi
28th-30th October, 2010**

Introduction

The Lean Philosophy is changing the way organisations operate. Many have rushed off, taken a course and pronounced themselves LEAN. Many have failed.

Yet very few have tested the depths of overall performance enhancement and added competitiveness possible with a complete change of paradigms in the "lean" direction. Research by Gallup has uncovered that less than 30% of employees are truly engaged in their jobs.

Lean Thinkers have long shown that an additional 25-40% of the work done by most organisations is waste or non-value added.

This means that 40% of every payroll dollar is easily lost. With the advent of true global competition, can you afford to lose 40% of your time as a company?

Our investigations have come to the conclusion that the manufacturing sector is polluted by an astonishing 35% of completely wasted labour. Can that be afforded any longer?

By presenting in rather great detail the philosophy of the second industrial revolution and the main tools and disciplines readily available to all manufacturing enterprises to perform in an "excellent" status, this course is a door-opener to lean practices for whoever is: ready to listen to the message – prepared to abandon obsolete principles, formulas and approaches – willing to get to "lean" status.

This course will prove that competitiveness today can no longer be achieved by merely cutting costs or revamping technology: because cutting costs has a floor, while performance improvement through maximisation of value-added and waste elimination has no ceiling and because technology alone does not generate the levels of output value enterprises and organisations need to tackle the challenges of the new millennium.

"..in a rapidly changing world, featuring vanishing borders and hot, global competition, all manufacturing concerns, must aim at new performance targets in line with "the best in the class-room".."

"if it doesn't add value, it is waste."

Course Objectives

This course is designed to give participants a practical, "hands-on" presentation of the Lean Manufacturing discipline, addressed to dramatic improvements in productivity, quality and reactivity to clients' needs and expectations (World Class Performance status). Specific objectives of this course are:

- To highlight the vital importance of a global attention to "value" in the manufacturing industry.
- To make participants aware of the Value Adding Management and Systematic Elimination of Waste principles, and furnish hints and practical guidelines for their practical implementation in the manufacturing industry.
- To make participants acquainted with Lean Manufacturing, Flow Production and Cell Manufacturing principles, by studying practical cases of successful implementation.
- To give participants practical criteria to identify, in their own manufacturing concern, those processes in which Lean Manufacturing techniques could be implemented smoothly.
- To show the relationship between Lean Manufacturing and allied disciplines such as Total Quality Management, Total Productive Maintenance, Achieving Quick Change-Over and Total Employee Involvement

Who Should Attend this Course?

- Plant / Factory Managers,
- Manufacturing Directors / Managers
- Operations Directors / Managers
- Production Directors / Managers
- Planners and Supervisors
- Quality Assurance Directors / Managers
- Chief Engineers
- Heads of Maintenance

Trainer Profile:

Dr. Carlo Scodanibbio

Dr. Carlo Scodanibbio, born in Macerata, Italy in 1944, holds a doctor degree in Electrical Engineering from Politecnico di Milano in 1970. He has over 40 years of experience in Plant Engineering, Project Engineering and Project Management, as well as Industrial Engineering and Operations Management. He has been an Independent Industrial Consultant and Human Resources Trainer since 1979 and has worked in a wide spectrum of companies and industries in many countries including South Africa, Italy, Cape Verde, Romania, Malta, Cyprus, Lebanon, Mauritius, Kenya, Saudi Arabia, Malaysia and India. His area of expertise lies in World-Class

Performance for Small and Medium Enterprises in the Project, Manufacturing, and Services sectors.

He has co-operated, inter-alia, with several Italian Chambers of Commerce and Industry, the Cyprus Chamber of Commerce and Industry, the Cyprus Productivity Centre, the Malta Federation of Industry, the Mauritius Employers' Federation, the Romanian Paper Industry Association, the United Nations Industrial Development Organisation, the Federation of Kenya Employers and the University of Cape Town. His courses and seminars, conducted in English, Italian and French, have been attended by over 14,000 Entrepreneurs, Managers, Supervisors and Employees. They feature a very high level of interaction, and are rich in simulations, exercising and real case studies. The approach is invariably "hands-on" and addressed for immediate, practical application.

Past participants say;

Thank you for your time in making people think lean and your practical educating skills.

[George Omondi – Planning Manager – General Printers Ltd – Kenya]

Course content of very high value. Can see my way forward with this "lean" concept. Presentation conducted very professionally. Excellent course, enjoyed it immensely.

[Deon Fourie – Production Manager – Plaaskem - Boksburg – South Africa]

Excellent course, I cannot wait to start to implement what I have learnt in practice!!

[Rikus Grobler – Operations Manager – Namibia Beverages – Windhoek – Namibia]

...it has opened a way in my work where I need to improve, especially on waste reduction...

[Hamilton Kazungu – Production Manager – Brookside Milk – Nairobi - Kenya]

An excellent seminar. I started by having doubts about attending this seminar (...no time, you know....). I think it is one of the best decisions I have made during the last year is not to have missed it

[Aref Mikati - Plant Manager - Pharmaline - Sarraf Group Sal – Beirut - Lebanon]

An excellent course. This is a must-attend course for those who need to adopt lean systems – and for those who need to survive the turbulent market place

[Joseph Kimbo – Optimisation Engineer – Bamburi Cement Ltd – Kenya]
